

# Institute for Environmental Nanotechnology

**“Graphene-NH<sub>2</sub> is an allotrope of carbon whose structure is a single planar sheet of sp<sup>2</sup> bonded carbon atoms that are densely packed in a honeycomb crystal lattice”**

**We supply graphene-NH<sub>2</sub> of high quality at very competitive price. We also provide graphene-NH<sub>2</sub> in various forms and its relative technologies to full fill the unmet demands and applications of our various customers.**

Graphene	Description
Production method	Chemical Vapor Deposition [SLV]
Available form	Black powder
Purity	96%
Thickness	~3-4nm
Surface Area	~350 m <sup>2</sup> /g
Number of layers	1-4

Graphene-NH<sub>2</sub> is supply in Small Quantity for Researchers and In bulk quantity of Graphene-NH<sub>2</sub> companies or institutes for application developments at very cheapest price. please contact us for a quote. Our products are packaged in suitable, secure, tamper proof enclosures. We have free delivery of Graphene-NH<sub>2</sub> in India and also we can deliver globally.

## Warranties and Disclaimers

Institute for Environmental Nanotechnology (IENT) warrants that its products shall conform to the description of such products as provided by IENT through IENT's literature. This warranty is exclusive, and IENT makes no other warranty, like merchantability or fitness for any particular purpose.

## Precautions and Disclaimer

This product is for R&D use only, Not for other uses. Please consult us for safe handling information.
